Almeva B.V.: more than 30 years a reliable partner and supplier of first aid, emergency and medical supplies for businesses and professional rescue organizations.

Since 1983 Almeva BV is a medical wholesaler, supplying the end user. We can call ourselves one of the leading suppliers in the market for ambulance services, and an important partner for businesses, both SME's and large reputable companies.

Almeva BV is certified according to ISO 9001 quality standards.

Apart from the complete device for Emergency and First Aid room, we provide AEDs and rescue and evacuation products. We also have an extensive collection of training manikins (www.oefenpoppen.nl).

Providing good service to us naturally. We consider quality, reliability and fast delivery aspects of a good service. Unique is that we have our own warehouse, so we ordered many products today have been able to deliver tomorrow.

Our employees have a great product and market knowledge. We are continually looking for innovative products to improve (where possible) of your assistance. We seek close cooperation with our customers after and can give you appropriate advice regarding your product selection.

Additional activities:

- maintenance and service on the delivered items.
- Almeva BV works with reliable partners for the provision of BHV of training or the construction and control of the fire supply buildings.

1. Emergency cases, bags and cabinets

Professional cases for Emergency

Our cases are renowned for their top quality workmanship and innovation, brought about by our joint co-operation with industrial designers, aluminium specialists and the emergency services for the last 80 years. Our emergency case concept is very simple and centres on stability, orderliness, overview and hygiene.

The cases are built to provide maximum stability to sensitive medical equipment during transport. The contents are stored in an orderly system to ensure the user has an immediate product overview once the case is opened. The complete case contents, including the rastflex-divider-system, can be removed after use, thus allowing the case to be quickly and hygienically cleaned before re-use.

The cases are available with or without first aid fillings. The content (see this catalogue) is compiled and classified in consultation with the customer.

All aluminum First Aid cases feature labels and colored icons. Usually labeled with first aid, but this can always be adapted to the customer requirements. The icons represent what the contents of the briefcase.

The **CLINOMED Emergency case** is popular amongst rescue services worldwide. Made from 1,5 mm aluminium alloy with a transparent anodized finish. All corners have aluminiumwelded shock absorbers that are reinforced in a high tech process. The two equally sized case shells have a depth of 125 mm and the innovative rastflex partitioning system. Top shell has a plexiglas-transparent lid cover with a magnetic lock, varioflex-ampoule-storage-system, double rows, 64 elastic ampoule grommets in 6 different colours with corresponding colour bands for lettering. Bottom case shell with rastflex-compartmental-dividers and guedel airway holder. Screened lettering 'Emergency' with coloured pictograms of the function groups.

Measurements 52 x 38 x 23 cm. Weight empty ca. 7,2 kg.

CLINOMED

The **EUROMED Emergency case** is a "classic" ambulance case. Manufactured from 1,5 mm aluminium alloy with a transparent anodized finishing. Top case shell is 45 mm deep. Contains rastflex-compartmental-dividers and a plexiglas inner lid with magnetic locks. The varioflex-ampoule-storage-system houses 32 elastic ampoule grommets in 6 colours Bottom case shell is ca. 125 mm deep. Contains rastflex compartmental-dividers and guedel airway holder. Screened lettering 'Emergency' with coloured pictograms of the function groups. Measurements 52 x 38 x 17 cm. Weight empty ca. 6,4 kg

First Aid Cases: Programme 2000

The Programme 2000 CD is a field proven system for First Aid care, be it mobile or stationary. The programme consists of 3 first-aid case sizes, color orange. Unlike other First Aids kits, the Programme 2000 CD kit does not need any maintenance. Only high grade, unobstructed ABS material is used in order to meet the high hygienic requirements.

Excellent security facilities: no sharp corners or edges, all parts are rounded and streamlined. They have a wall-bracket with 90° stoparrest system. Guaranteed longevity, durability. High mechanical and tensile solidity. Temperature resistance, splash proof and a high chemical resistance. Rubber sealing hygienically protects the sensitive medical equipment against dust and dirt. Flexible inner partitioning and security seals. We offer 5 year guarantee on colour and closing parts i.e. clips, handle and hinges. Tailored printing available.

First Aid Workplace Specials

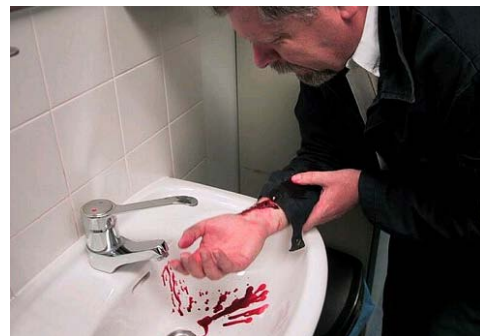

Where First Aid is concerned, a building site cannot and should not be compared to an office. The same rational should be applied to all industrial sectors. Almeva has objectively researched the injury types and frequency within several industrial sectors. Our conclusions have lead us to introduce a new line of firstaid cases, with tailored contents based on the most frequent injuries. Each case is then stocked with high quality first-aid products, each carefully selected to satisfy the particular demands of the specific occupation.

The basis for the First Aid kit workplace special is the multi-CD case, dimensions 40 x 30 x 15 cm, color orange.

A maintenance contract ensure you that the contents of the suitcase is always up to date in terms of reliability and durability.

Doctor's Bag /Child Emergency Bag

PAX Plan Oxy-Compact oxygen bags

The bag for carrying maximum supplies in the O2 sector: Quick-release closure with access to an oxygen bottle with attached valve bag and/or demand valve!

An ampoule kit with the most important resuscitation medications can be stored in the bag's rear section.

The side pockets offer space for a suction unit (supply through outlet in the center wall) or a manual aspiration pump.

Intubation set and small items can be stored either directly in various loops or in our intubation bags.

The outer pockets can accommodate, e.g., two small infusion bags. The backpack carrying straps permit comfortable carrying, even for longer periods of time and in difficult terrain!

Inside pocket and intubation bag are not included. 1x shoulder carrying strap, 1x oxygen holder, 1x easy zip-it set, 1x backpack straps.

Size L: 58 x 25 x 27 cm. Capacity: 46 liters. Weight: 3.1 kg.

Size XL: 70 x 25 x 27 cm. Capacity: 56 liters. Weight: 3.2 kg.

This 10 cm wide, all-in-one device consolidates multiple first-aid devices such as a primary dressing, pressure applicator, secondary dressing, and a foolproof closure apparatus to secure the bandage in place. This internationally patented and FDA approved bandage is the ideal solution for emergency treatment when every second counts. The Emergency Bandage's sterile, non-adherent pad applies pressure to any site, can be easily wrapped and secured, and has an additional application, similar to a tourniquet, to further constrict blood-flow.

Adhesive tape plasters from BSN and SÖHNGEN

Adhesive plasters from BSN and Söhnngen for fixation of wound dressings.

Leukoplast BSN - tan-coloured zinc oxide tape for securing dressings and bandages. Strong adhesive.

Leukopor BSN is a skin-friendly, hypoallergenic and porous adhesive plaster on the basis of a white non-woven polyester / viscose film. For very sensitive skin.

Leukosilk BSN is an exceptionally strong, white, hypoallergenic tape for general-purpose use on sensitive skin.

Leukofix BSN Leukofix is a transparent tape ideal for securing dressings, particularly in emergencies or intensive care. It features an air and moisture-permeable polyethylene film.

Leukoflex BSN - transparent hypoallergenic surgical tape ideal for securing dressings on patients with sensitive skin.

SÖHNGEN adhesive tape, plast - high stretch, flesh coloured, elastic tape. Flexible to conform to body movement. Strong adhesive for long lasting wear.

SÖHNGEN adhesive tape, silk - skin friendly, plaster tape made from acetate silk. Porous adhesive allows skin to breathe more easily. Hyperallergenic, easy to apply and painless to remove.

3. Patient transport and immobilization

Stollenwerk carriage and stretchers

New in our collection are the aluminum carriages and stretchers Stollenwerk for ambulance services. All components are modular and adaptable to your needs and requirements.

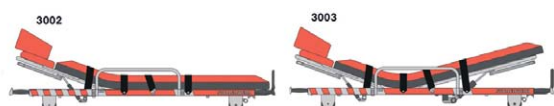

Stollenwerk carriages 4002/03 - are light but very stable bases made of anodized aluminum. The variable height and retractable front legs to make loading and unloading safe. Specification: 200 (L) x 55 cm (B). Min. and max height with stretcher: 31 to 100 cm. Load Height: 63.5 to 73 cm. Weight: 27.5 kg, max loading weight: 250 kg.

The 4003 is identical to the 4002 except that the two front wheels are 160mm instead of 125mm, which gives extra stability on uneven ground.

Stollenwerk stretchers 3002/03/06/08 made of anodized aluminum stretcher according to DIN EN 1865. The differences between these stretchers are in more or less adjustability of the bed base. Back, feet or abdominal area can be controlled by means of gas springs independently. The carrying handles are extendable to all stretchers and the side tube is foldable.

Specifications: Length (with carrying handles input and extended) 191 to 230 cm. Width, between two side bars, 55 cm. Height including base rod 30 cm, stretcher to top side bars 31.5 cm.

We are happy to inform you about the possibilities to put carriage and stretchers together!

Stretchers N/K and carriages

Brancard N (1x foldable) size 230 x 55 x 13 cm; folded 192 x 15 x 14,5 cm. Weight 7,3 kg. Seamless aluminium structure. Carrying capacity to 150 kg.

Brancard K (2x foldable) Same models as above but twice fold. Dimensions folded 99 x 13 x 17.5 cm.

Stretcher Carriage for N and K - Made of high quality seamless steel tubing, measuring 106 x 57 x 70 cm. Colour white. Electrostatic white powder coating. Solid and stable workmanship to ensure long lasting durability.

Evacuation chairs from MEBER and Escape-Chair

An essential implement to easily carry patients in places like stairs, corridors and lifts where stretchers usually cannot be used.

Meber Sedan escape chairs in two models:

Meber Sedan Maya 650 - the simple variant has two wheels and extra carrying handles that can be adjusted in height and length. The patient quick release straps can be adjusted in length.

Meber Sedan Extra 670 - robust and luxurious variant with four wheels and adjustable carry handles. Includes 3 patient straps and storage bag.

Escape-Chair is available in four designs to meet every situation. Just one operator can bring a physically-dependent person down the stairs to safety.

The **Escape Standard** version is provided with a single back support and a stable extending handle. The **Standard-ALU** is simplest model without foam grip on handle, no seat straps and no padded headrest. At the **Standard-ALU Extra** is an additional package with anti-slip lower bracket and handle, padded headrest and extra seat fixation.

The Escape Plus has a double ergonomic, curved back support, a stable extending handle, which is adjustable in length. Anti-slip foam grip on handle and a padded headrest are other features of this model.

The Escape Comfort model has the same features as StandardPLUS plus a foot rest and arm rests, making it ideal for use with the disabled or the elderly in offices, local government buildings or in care centres and nursing homes.

Saver One Automated External defibrillators

An automated external defibrillator (AED) is a portable device that checks the heart rhythm. If needed, it can send an electric shock to the heart to try to restore a normal rhythm. AEDs are used to treat sudden cardiac arrest (SCA).

Saver One AEDs are available in three variants. All variants are made of strong ABS plastic, shock-proof and water and dust resistant. Differences between the three Saver One AEDs are mainly in the extent of the possibilities which make with the target group for which they are designed.

Saver One Standard - an easy to use but reliable AED with illuminated icons and voice prompts. Especially suitable for the layman-rescuer to perform lifesaving actions effectively. Includes convenient carrying bag and a 5 year warranty.

Saver One D - the D version is particularly suitable for more experienced (para) medical workers. A large 13 cm LCD screen shows ECG waveform records, information on heart rate, impedance, fibrillations, the shocks delivered, etc.

Saver One P - a robust AED, especially suitable for the professional rescuer. The P has a manual mode that makes it truly a professional defibrillator for the most demanding rescuer.

Furthermore, various accessories are available separately as an adult pads, baby pads, AED Trainer, batteries and an AED wall cabinet with alarm.

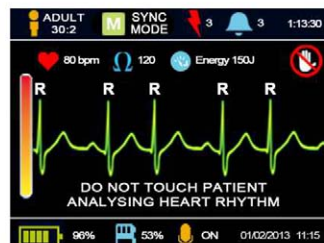

▶ Saver One Standard 200J	0107SAVERONE1
▶ Saver One D 200J	0107SAVERD
▶ Saver One P 360J	0107SAVERONE

ZOLL AED's

We provide two kinds of Zoll AED's: the Plus and Pro versions. The fully automatic motorized Plus version is primarily intended for the first aider / BHV staff or inexperienced worker, semi-automatic AED Pro is more suitable for medical professionals.

Zoll AED Plus

The PLUS version is specially designed for the inexperienced worker to do a safe and reliable resuscitation. The Zoll AED Plus is equipped with unique CPR-D padz, pre-connected electrode from a piece that excludes incorrect installation by the rescuer. The electrode is supplied with all the essentials and connections.

Supplied in a bag, a CPR-D padz ten Lithium batteries and an English manual. Weight: 3.1 kg. Size: 29 x 24 x 13 cm. Energy level: 120 J ascending. Electrodes and battery life: 5 years.

ZOLL AED Pro

The Pro version is particularly suitable for this professional care provider and has a number of additional features: a choice between manual and automatic mode, an LCD screen for displaying and analyzing ECG data from the patient and data storage via USB or infrared port.

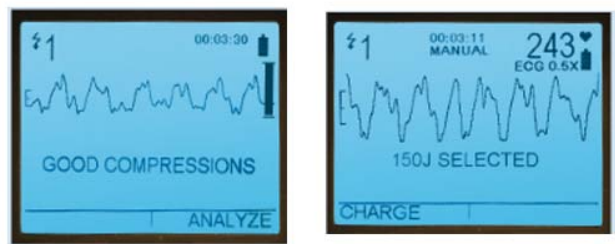

Due to its rubber casing, this AED also extremely robust and durable. The AED has drop test from 1.5 m endured and has an IP55 certification for waterproofing spray.

The AED comes with ZOLL lithium battery, Stat-Padz II electrode (optional CPR-D Padz) and EN manual. Dimensions: 7.6 cm x 23.5 cm x 23.9 cm. Weight: 2.9 kg. Energy level: 120-200 J (adults) and 50-85 J (child.)

We also supply various Zoll **AED accessories** such as CPR-D padz, Stat-padz II and batteries.

► Zoll AED Plus	0107932
► Zoll AED Pro	0107937
► Zoll Stat-pad II electrodes adult	0107938
► Zoll Stat-pad II electrodes adult 12 pair	0107939
► Zoll Pedi-padz II electrodes child	0107935
► Zoll AED Plus CPR-D Padz adult	0107933
► Zoll Pace Padz	0107080
► Zoll Pro Lithium battery	0107936
► Zoll Pro Lithiumbattery 3 volt 13A 10 pieces	0107934

For the Samaritan and Philips HeartStart AEDs such as HS1 and FRx we also offer pads and batteries.

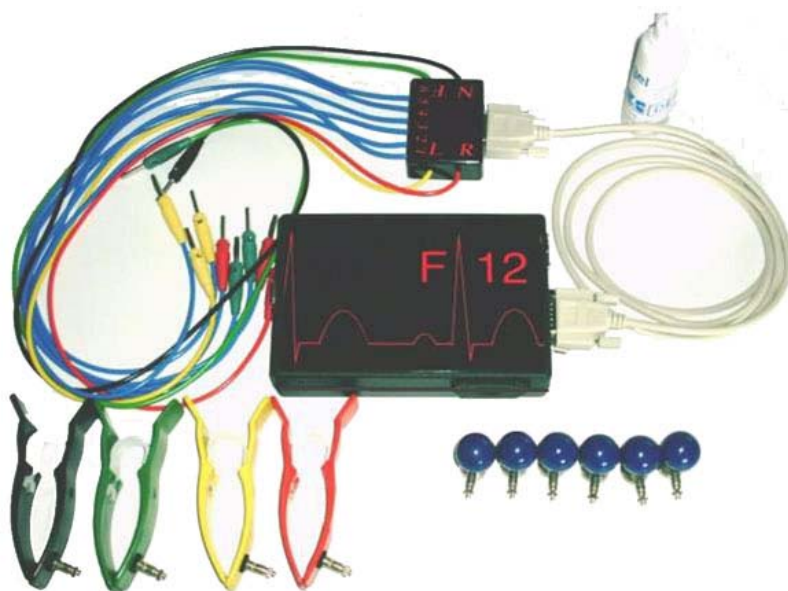

ECG F12

The ECG F12 makes it possible to display ECG recordings on a computer screen. All 12 leads are recorded simultaneously (recording duration of 10 seconds). The recordings can be stored and imported from patient files. A complete pathological library stored. Two different recordings can be compared with each other simultaneously.

The device comes with ECG cable, 10 wires, 4 clips for the limbs, 6 suction cups, a user manual and software on CD-ROM.

There are two versions: one with wire connection (via USB and serial port) and wireless. The distance between the patient and the PC can be up to 10 meters.

► ECG F12 wired	0107F1201
► ECG F12 wired and wireless	0107F1202

ECG electrodes

Blue Sensor ECG electrodes have an asymmetric connection. Therefore they cause less interference by cable movement. The electrodes are easy to connect and are suitable for any type of ECG recorder.

The wet gel versions are for adults and children. The solid repositionable gel version is for neonates.

Ambu White Sensor single use electrodes with a highly conductive solid gel with strong adhesion, for good signal quality during short-term ECG monitoring applications.

3M Red Dot universal, hypoallergenic electrodes last up to five monitoring days. 3M Electrodes neonatal are ideal for use in Intensive Care Units for shorter term monitoring on smaller, less active premature babies and infants.

Cadence and Quick Combo defibrillation electrodes are for the Lifepak defibrillator. Per pair.

We also supply electrode clips and print paper for ECG monitoring for Lifepak and Corplus.

- ▶ **Blue Sensor R-00-S** 25 pcs., Ø 48 mm

Suction

Weinmann Accuvac Rescue Suction Pump

The Weinman Rescue is de top of the suction devices. Max.: 0,8 bar (80 kPa). Container: 900 ml. Suction capacity: 20 l/m. Size: 370 x 280 x 140 mm.

Weinmann Accuvac Basic Suction Pump

Simplified implementation of Weinmann AccuVac Rescue.

Boscarol OB 2012 Suction Pump

Powerful, easy and compact. Suction capacity: 30 lt./min. Control-manometer from 0÷800 mbar. Autoclavable 1000 ml jar. Size: 35 x 12 x 24 cm. Weight: 4,5 Kg. Wall bracket included

Boscarol OB Minivac

Very compact suction unit. Pump over 12 lt/min. Suction superior to 700 mbar. 500 ml autoclavable jar. Dimensions 165x68x198 mm. Weight: about 2.200 gr. Carrying bag included.

Accu-Vacu

Robus suction pump, adjustable from 0 to 800 mbar. Weight: 7.2 kg. Size: 220 x 235 x 65 mm. 1.000 ml secretion container. Protective filter, control valve, recharger, external recharging cable and carrying bag included.

Serres Laerdal LSU suction unit NL model

New compact model. Integrated vacuum regulation/power control. 25l /m. Weight: 4,0 kg, secretion container: 1000 ml.

LMA MAD Nasal™ - needle free drugs delivery

The LMA MAD Nasal spray attachment is mounted on a syringe. When IV delivery is less than ideal, LMA MAD Nasal can come to the rescue delivering safe, painless, and rapidly effective treatment with minimal resource utilization. With no danger of needle sticks, no need to sterilize, and no cumbersome and time consuming IV setup, this intranasal mucosal atomization device will deliver a mist of atomized medication that is absorbed directly into your patient's blood stream.

B.Braun Perfusor® Compact Syringe Driver

The B Braun Perfusor Compact Syringe Drive is a lightweight, battery-operated infusion pump that infuses fluids from a 20 or a 50ml syringe at a controlled rate.

The B.Braun Perfusor Compact Syringe Pump was designed primarily for use on hospital wards but can be equally effective in ambulances.

The unit offers portability via mains or AA battery operation. Delivery Rate 0.1-99.9ml per hour. Simple Syringe exchange using either 20 or 50ml B.Braun Perfusor Syringes, the size of which is automatically recognised by the pump. High rate of precision & flow consistency. Computer Controlled operation for data transfer via RS 232 interface.

Syringe Pumps are stackable with a built in locking mechanism to form "batteries". Thus up to 3 Perfusor Compact units can be locked together allowing uninterrupted continuation of infusion therapy during patient transportation. WxHxD(mm): 190x100x120.

5. Resuscitators and oxygen

Meditech MicroVENT resuscitators

The latest generation Micro-Vent® resuscitators Meditech are currently the most advanced affordable volume / time controlled resuscitators / ventilators on the market. Key Features:

- Lightweight and compact in size; all controls located in the grip
- Pneumatic oxygenation
- Automatic (time / volume-controlled) and a manual mode
- Respiratory assist valve
- Excellent view of patients and controls
- Simple operation with ergonomic design

AMBU Mark IV Resuscitator
adult and baby variant

AMBU Oval Plus adult and child

Model: microVENT Classic Airmix A/C 670-0060-00

AMBU resuscitators

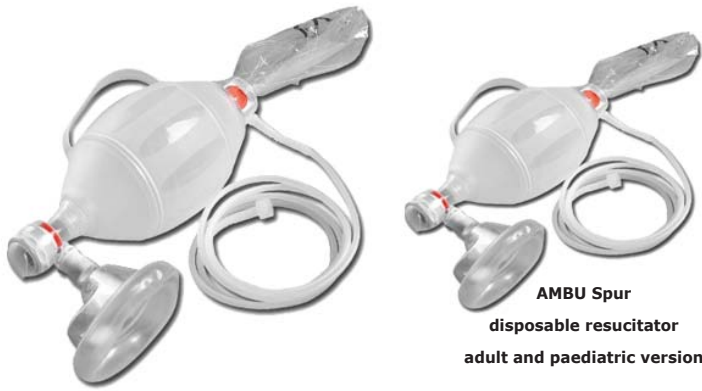

Ambu® Mark IV

Re-usable Resuscitator Ambu Mark IV is available in two sizes: the Ambu Mark IV Adult is designed for manual ventilation of adults and children with a body weight of down to approximately 15 kg (3 years), and the Ambu Mark IV Baby for infants and children with a body weight of up to about 20 kg (4-5 years). The double wall bag provides build in pressure limitation Unique single-shutter valve system. 100% Latex free.

AMBU Oval Plus Silicone Resuscitators

mbu Silicone Resuscitators are semi-transparent and come with a pressure limitation valve (excl. adult version). The resuscitators feature a textured surface and come with a unique support strap ensuring a firm grip and providing effective ventilation. The adult, and infant/child versions deliver tidal volumes of 1500 ml, 450 ml respectively. Ambu Silicone Resuscitator, adult, body weight down to 30 kg (10 years). Ambu Silicone Resuscitator, infant/child, body weight of 10-30 kg (1-10 years).

Hyperventilation

Hyperventilation mask

The symptomatic therapy of re-breathing is a recognized first-aid procedure and has a proven success rate in the treatment of the hyperventilation syndrome.

Hyperfree breathing cassette

The Hyperfree is an effective, discreet rebreathing device for people who suffer from hyperventilation. It consists of a cassette made of two parts. The inside looks like a labyrinth. During an attack, the patient places the opening on the short side of the cassette against his mouth and exhales.

Intubation

Intubation case SN-CD ambulance

Model SN-CD case from the Programme 2000 CD series. Size 31 x 21 x 13 cm. Made from ABS thermoplastic. Orange.

Contents: HEI-LEIT cold light laryngoscope, battery handle and 3 McIntosh blades (small, medium and large), and 1 Baby Miller blade, stored in a pre-laid foam block.

Additionally, the case contains a bandage scissors, forceps, Pean-clamp, endotracheal tubes, intubation stylet, Wendl tubes, Guedel tubes, blocker injection, bite protection mouthpiece and plaster tape.

► Intubation case SN-CD Ambulance

0106001

metalen laryngoscope
handle and blades

Cold Light Laryngoscope HEI-LEIT (ABS)

The HEI-LEIT laryngoscope is a combination of high quality ABS handle and blades, a series of fibre optic cabling and a high density halogen light system. Clicking the McIntosh blade into position on the handle exerts a pressure on the spring mounted halogen lens light inducing pin-point light accuracy. The 4 HEI-LEIT blades have excellent sliding properties thus avoiding unwanted reflexes during intubation. The HEI-LEIT handle and blades are impact and light resistant, physiologically safe, easy to clean and autoclavable to 134° C.

King Vision® Video Laryngoscope

The King Vision is an affordable, durable and portable video laryngoscope. It is designed for indirect laryngoscopy, difficult endotracheal intubations as well as routine intubations. The King Vision accommodates minimum mouth openings of 13mm for the standard blade and 18mm for the channeled blade making it effective for the majority of adult patient populations. The King video laryngoscopes combine the best features of traditional laryngoscopes, fiber optic laryngoscopes and new cutting-edge visualization technology to offer clinicians an immediate and clear view of the vocal cords.

7. Training and Exercise

Patient simulators

Simulaids STAT and PDA STAT Manikins

STAT and PDA STAT Manikins are Simulates Aids new generation of lifelike modular upgradeable patient simulators. The 1.78 meter long body is a real-life "patient".

The **STAT Simulator** brings you a full range of skills to practice on a life-size manikin. Standard ALS components of ECG rhythm recognition and defibrillation, airway maintenance, IV arm, and CPR features are augmented with this shortened list of features: automatic cardioversion upon defibrillation with 17 heart rhythms, tongue edema and laryngospasm, cricothyrotomy, bilateral chest decompression & tube insertion sites, 12 pulse points, venus access from dorsal hand to upper arm with all major veins, practice sharps control, sterile technique, securing and phlebotomy. STAT Manikin comes assembled (except knee joints) in its own hard carry case with wheels, sweat suit, and a supply of replacement parts.

PDA STAT manikin has the same capabilities as the STAT, but with extra electronics scenarios. Take your ALS training into your students' environment in order to evaluate their knowledge, skill levels, and critical thinking abilities utilizing the applications in a Palm O/S patient simulator. Challenge your students with skill proficiency, knowledge demonstration, and critical thinking skills as you put them through belligerent crowds, anxious family members, dangerous environments, and any other true scenario training exercises. PDA STAT manikin comes with a PDA, USB cable, blood pressure cuff, programming, hard carry case, sweat suit, and a supply of replacement parts.

Life/form training manikins

Life/form Adult CRiSis Manikin

The Crisis Manikins Adult Life / form is a complete resuscitation system with five features that different scenarios can be trained. The dolls in this series each consist of a full body CPR manikin, an IV arm, a blood pressure arm, chest defibrillator skin and they have an Airway Larry Airway Management Head. Perfect for ambulance staff, nurses and paramedics at every level. The parts are modular and available separately.

The basic version, as described above, can be extended with a **DeLuxe** version with an arrhythmia patient simulator which simulate 17 adult and 17 child's heart rhythms. With an external pacer, you can simulate electric shock. The cardio version can simulate manual, semi-automatic and automatic defibrillation.

Life/form Infant CRiSis Manikin

This state-of-the art manikin is designed to train people individually and in groups in lifesaving techniques on children and newborns. The components are available for composing your own manikins or to upgrade an existing one. This manikin is especially ideal for the training of ambulance staff, nurses and paramedics at every level. Infusion therapy, umbilical catheterization, airway management, intraosseous infusion and CPR manikin all in one! The skin and umbilical hose are realistic. Moisture can be removed through the umbilical cord. The IV Arm and leg make realistic practice of pediatric vein puncture possible. This version comes complete with a four-channel ECG monitor.

Life/form complete Geri/Keri verpleegzorg oefenpoppen

Geri manikin is an elderly manikin that resembles a geriatric patient.

Geri The model is therefore ideal for training of all nursing and medical skills with the elderly. Geri The model is visually very realistic and shows a striking resemblance to an older skin including wrinkles and folds. The limbs and joints of Geri allow a realistic maximum range of motion and positioning. The normal appearance of the manikin is female, however, after removal of the wig and the addition of the male genitalia may male catheterization and prostate examination place can be done.

The **Keri model** is age-neutral and has all the features of the Geri model. Here again, male genitalia can be attached for a male role.

With Geri / Keri-nursing care models more than 35 patient care skills can be trained, including: finger/toe wound care, bed washing, dressing, combing hair, teeth removal (top and bottom) clean inner ears, placing hearing aid, urinary catheterization women and men (uncircumcised), enema administration (female), prostate examination (man), ostomy care, ileostomy and colostomy rinse and extraction, placement of nasogastric probes, oral and nasal lavage, tube feeding and extraction, cervical smear, oral hygiene, tracheostomy care - rinse and extraction, four intramuscular injection sites, eye cleaning, patient positioning and transfer techniques. An IV Arm and / or blood pressure arm is an added option.
